

Califat Coal Mine, St George's Hill, Swannington Photographic Report Of LIHS Excavation - August 2021

Califat Engine House

Barrowing tons of topsoil continued at the track end of the engine house.

The rebuilding of the well like structure, often referred to as the BBQ, commenced with the most difficult element - getting the head around the pattern of the original construction and working out which bricks fit where.

Califat Coal Mine, St George's Hill, Swannington Photographic Report Of LIHS Excavation - August 2021

Continued weeding and landscaping the area between the winding drum void and the ventilation tunnel.

The sages contemplating how much the site has improved in recent months and the remaining work to be carried out.
